Experience

Senior Software Engineer, Tech Lead

Jun. 2022 - Present

Canoo - Torrance, CA

- Led development of a mobile app successfully delivered to the US Military, facilitating the trial of our product which expanded interest and adaptation into a new market.
- Developed Generative AI vehicle-connected web applications for clients such as Walmart and USPS, extending our transactional product offering into a cloud-based Software as a Service (SaaS) subscription model.
- Architected and delivered an immersive 3D virtual showroom; a highly effective online marketing tool for customers to explore our electric vehicles, enhancing customer engagement and brand visibility.

Full-Stack Software Engineer

Feb. 2019 - Jun. 2022

P.C. Richard & Son - Farmingdale, NY

- Organized interdepartmental meetings to identify inefficiencies; identified a wholesale quoting inefficiency in the use of bloated spreadsheets, then built custom intelligent quoting software reducing this process from weeks to hours.
- Developed our business-critical secure mobile payment system during COVID-19, enabling rapid company recovery; rehired >1000 furloughed sales personnel within days, and generated additional revenue of \$65 million from March through July 2020.
- Created a software framework to build suites of custom internal tools, revolutionizing how internal business is done.

President

Apr. 2019 - Jun. 2022

Long Island Systems User Group - Westbury, NY

- Managed a 13-person board, hosting industry speakers on IBM topics, networking and sharing throughout the community.
- Delivered technical and non-technical presentations to audiences of 30-50.

Founder, Chief Technology Officer

Sep. 2017 - May. 2019

ArkAngel - Rochester, NY

- Founded a startup through SUNY Geneseo's VentureWorks program aimed at providing a hazardous material management system.
- Implemented lean startup principles with a focus on exploring customer segments and building around a pain point.
- Regional finalist for the New York Business Plan Competition in 2018, then secured a grant through the National Science Foundation.
